*The rose is a rose from the time it is a seed to the time it dies.
Within it, at all times, it contains its whole potential.

WHY A SKIN CARE LINE THAT IS ORIGINALLY 100% NATURAL?

There can be a natural reason “only put products on your skin that you can also eat”. Van der Pigge Huidbalans (Skin Balance) contains no substances that can harm your health. No parabens (chemical preservatives), no mineral oils or silicones, no nylon particles or microplastics and no synthetic ingredients: originally 100% natural.

This means that you sometimes have to shake a product from the series well before use, because the emulsifiers used are also of natural origin. A shampoo can also foam less well than you are used to because no aggressive soaps are used. And it can get used to that there are no synthetic fragrances in it: the scents are soft and natural. We know for sure that it is a relief and that you will not want anything else in the future.

Our products are made as much as possible with raw materials from organic cultivation and almost all have the NCS quality mark (Natural Cosmetics Standard). This means:

- no microplastics
- no genetically modified ingredients
- no parabens, silicones, PEGs or phthalates
- no irradiated ingredients
- only natural fragrances and plant based solvents
- packaging material that can be recycled or reused
- not tested on animals

In other words, a natural cosmetics standard based on sustainability. Something to be very happy with and proud of.

EcoControl guarantees the control of the organic ingredients in all our products. Van der Pigge guarantees a reliable product, as our customers have come to expect since 1849.
